

| Document Type        | Code         | Date       | Version |
|----------------------|--------------|------------|---------|
| Technical Data Sheet | Z-200/248.01 | 01.09.2022 | 01      |

| Material Category | Material / Product Specification |
|-------------------|----------------------------------|
| Plastic Netting   | ST029-80                         |

|                                  | Unit  |                      |
|----------------------------------|-------|----------------------|
| Mesh Structure                   | -     | Diamond              |
| Polymer                          | -     | PE                   |
| Colour                           | -     | Violet               |
| UV Stability                     | -     | No                   |
| Width                            | mm    | 40 – 80              |
| Layflat                          |       |                      |
| Length                           | m     | 50.0 – 51.0          |
| Joint Thickness                  |       |                      |
| Weight                           | gr/lm | 28 – 30              |
| Mesh Size – Machine Direction    | mm    | 43 – 45 (= 2 meshes) |
| Mesh Size – Transverse Direction |       |                      |
| Tensile Strength – MD            |       |                      |
| Tensile Strength – TD            |       |                      |

| Comment  | For and on behalf of Milmar, spol. s r.o.  |
|--|--|
| <ul style="list-style-type: none"> <li>• Soft and formable at temperatures from – 40 °C to + 85 °C</li> <li>• Resistant to grease, oil, water, and some acids</li> <li>• Reusable</li> </ul> | <br>Milan Polouček, Managing Director |

The above data are based on the knowledge available at the time of printing and may be subjected to amendments due to changes of the methods of manufacturing. The figures are reported as typical values only and should therefore not be taken as a guarantee of performance.
